The IV5 Series encompasses a range of compact, durable, and high-performance inverters designed with adaptive technology, making them ideal for integration into various ...

The high-voltage inverter converts direct current (DC) from the batteries or generator to alternating current (AC) to power the traction drive motors.

Our 800-Volt Silicon Carbide Inverter for Electrified Vehicles uses an innovative, double-side cooled silicon carbide (SiC) based power switch that delivers the higher power densities and efficiencies ...

The R-Series inverter is a compact, efficient and ISO26262 ready inverter. The product is a perfect fit for multiple HV applications such as eBus, commercial vehicles, marine or hybrid systems.

High-power AC-DC and DC-DC converter units with high efficiency and reliability. Modular units suitable for most modern applications.

Our Silicon Carbide inverter has the highest frequency switching rate that is currently possible and is 800V compatible. This means faster power transfer and a lighter system compared to 400V inverters.

Rated at 300 kilo-watts (continuous), this true sine wave unit can be operated with low voltage 800V DC input current and 480V AC output current. Output frequency is 50/60Hz, adjustable.

With the growing need for clean energy solutions, 800v dc ac inverter assumes an increasingly important role in optimizing solar energy systems. These devices are important to bring efficiency ...
