They also deliver the product to your doorstep. Prices mentioned above are the best (least) price available for each item across all stores.

How much does a central inverter cost?

As of February 2018, a central inverter costs approximately \$0.13 per watt, whereas a microinverter costs approximately \$0.34 per watt. Like string inverters, economic considerations force manufacturers to limit the number of models they produce. Most produce a single model that may be over or undersize when matched with a specific panel.

How much does it cost to replace a solar inverter?

The cost to replace a solar inverter averages from \$350 to \$3,500 and depends on the type and number of inverters. Replacing a single microinverter costs less than replacing a string inverter. Expect to pay \$200 to \$500 for the labor, plus the cost of the inverter (or inverters).
