In this season the sun is low to the south, so the 6 kW system is not producing anything in the morning, but despite that, it's still much more efficient than the Huawei System. Unfortunately ...

But before you start soaking up the sun, you'll need the right inverter to match your system. This guide breaks down what size solar inverter you ...

Avoid common inverter sizing mistakes homeowners make. Learn what goes wrong, why it happens, and how to choose the right size for your needs.

Should you undersize or oversize your solar inverter? Going solar has never been easier but knowing what your home or business needs is paramount.

Inverters are happiest when they're working in their normal range. A big inverter running a phone charger, a couple lights, and a router is way below its sweet spot. Efficiency drops, losses ...

In most cases, you will require permission to operate an inverter larger than 3.68kW, which can be a good reference number for maximum AC power. With this in mind, we would expect a ...

Experienced off-grid users often notice that large inverters consume more energy on their own, especially during the night when there is no PV input. Let's break down why an "oversized ...

When you pair an inverter that is underrated for the amount of power the system is designed to generate, that's called undersizing. There is also a situation where it may make sense to pair an ...
