-----

This would increase Ireland's energy storage capacity almost eightfold - enough to power every home in Ireland twice over on a still, cloudy day. Last year, 14% of all wind energy generated in ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and ...

The Electricity Storage Policy Framework 2024, prepared by the Department of the Environment, Climate and Communications (DECC), provides a roadmap for integrating electricity ...

The consultation stems from the Government's Electricity Storage Policy Framework of 2024 which, following a Call for Evidence on long duration electricity storage (LDES) by EirGrid in ...

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide secure,...

Energy Storage Ireland urges EirGrid to deliver Ireland's 500 MW storage target by 2030, boosting renewable energy, lowering electricity costs, and improving energy security.

The report explores options for back-up generation and storage most suited to Ireland's requirements, with zero- or low-carbon dispatchable generation seen as particularly crucial for a ...

While the renewable energy industry urged the Government and grid operator to be more ambitious with the procurement mechanism to reach the original 500 MW target by 2030, policy on ...
