It is the third statutory update to the plan since the Climate Action and Low Carbon Development (Amendment) Act 2021 was signed into law, committing Ireland to reducing ...

Ireland's 2030 Climate Action Plan is one of the boldest steps the country has taken in tackling climate change. With a legally binding target to cut greenhouse gas emissions by 55% by ...

Ireland is committed to reaching climate neutrality by 2050 (see trajectory in Figure 1) and to delivering a 51 % reduction in greenhouse gas (GHG) emissions by 2030, compared with 2018.

In 2023, Ireland's GHG emissions are estimated to be 58.82 million tonnes carbon dioxide equivalent (Mt CO<sub>2</sub>eq), which is 6.1% lower (or 3.79 Mt CO<sub>2</sub>eq) than emissions in 2022 (62.26 Mt CO<sub>2</sub>eq) and ...

Yet despite this awareness, Ireland's emissions reduction report card remains firmly in "must do better" territory. The State's legally binding greenhouse gas (GHG) reduction target is 51...

Ireland's Long-term Strategy on Greenhouse Gas Emissions Reductions sets out indicative pathways, beyond 2030, towards achieving carbon neutrality for Ireland by 2050.

The EPA's latest GHG emissions projections, for the period 2024 - 2055, indicates that Ireland is significantly off track to meet its legally binding climate targets for 2030.

Ireland has committed to reducing air emissions in national, EU and international agreements. These agreements contain targets that Ireland aims to meet, such as reducing greenhouse gas emissions ...
