Can you use solar energy on a balcony in Belgium?

According to the officials, Belgium is making it easier for people to use solar energy. New plug-in solar panels, also called balcony solar panels, are now available. These small panels can be easily put up on balconies, windows, or small outdoor spaces. They mentioned that people who rent or don't have a roof or garden can now use solar energy.

When will solar panels be available for balconies in Belgium?

Belgium launches plug-in solar panels for balconies on April 17, with an 800-watt limit per household for safety, supported by Energy Minister Zuhail Demir.

How do solar panels work in Belgium?

In Belgium there are two main types of solar panels. Solar Thermal Panels: these harness the sun's heat to produce hot water and heat homes. Equipped with sensors capturing up to 90% of sunlight, these panels transport heat to a water tank for storage, ensuring a continuous supply of hot water, even on overcast days.

Do you need a permit to install solar panels in Brussels?

While Flanders and Wallonia generally don't require permits, Brussels has additional visibility and protrusion regulations. Ground-mounted installations or those on protected buildings may need municipal approval. Inverters are crucial for converting solar-generated direct current to usable alternating current.
