Under the partnership, El-Mor will design and construct battery energy storage systems (BESS) and related infrastructure for multiple projects totaling 1.5GWh capacity and 300MW power ...

Israel has been rapidly expanding its renewable energy portfolio as part of its national strategy to reduce reliance on fossil fuels. This growth has increased the need for grid-scale energy...

Explore how 350+ Israeli energy tech startups are shaping decarbonization, grid modernization, and storage innovation with data from Finder.

The Israeli Electricity Authority (IEA) has awarded contracts for 1.5 GW of high-voltage battery storage across 11 projects in a recent tender. The awarded facilities will be developed in ...

HiTHIUM and El-Mor sign a strategic agreement for 1.5GWh of BESS projects in Israel, featuring the region's largest PV+BESS installation to support grid stability.

Israel is entering a decisive phase in its clean energy transition, with Battery Energy Storage Systems (BESS) becoming a strategic priority for grid stability, renewable integration, and...

Based at Bar-Ilan but to be run in conjunction with the Technion-Israel Institute of Technology in the northern city of Haifa, the body will oversee the development, training, and...

AI-Powered Energy Management: Israeli companies are creating sophisticated software platforms that optimize energy storage deployment, charging/discharging cycles, and grid integration ...
