Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired through ...

The scheme notified by Italy will support the construction of electricity storage facilities with a joint capacity of more than 9 GW/71 GWh. The scheme will run until 31 December 2033.

When Italy flipped the switch on its first grid-scale energy storage facility in 2023 near Milan, it wasn't just local engineers doing cartwheels. This 35MW lithium-ion battery system - about ...

The Italian government has authorized eight BESS projects that will strengthen the stability of the power grid. Companies such as Edison Next and GreenGo stand out in this initiative.

In this work, we analyse the system-level impact of deploying LES in Italy, focusing on social welfare and carbon abatement. The results show that the costs of LES need to decrease to justify their ...

On September 18, 2025, Sungrow, the global leading PV inverter and energy storage system provider, announced the signing of a supply agreement with Italian electricity generation company EP ...

It is reasonable to expect that, when fully operational, all new renewable energy plants will already be installed with integrated storage systems. And where the market does not cover the...

The European Commission has approved a EUR17.7 billion (\$19.5 billion) Italian scheme to support the construction and operation of a centralised electricity storage system to integrate ...
