In response, Osaka Gas and GPSS signed a memorandum of understanding in 2021*2 to collaborate on the continuous development of medium- and small-sized solar power plants and have since worked ...

Solar-powered installations--ranging from cutting-edge perovskite solar cells to creative reuse of decommissioned panels--were integrated into public spaces, demonstrating how clean ...

As Osaka accelerates its transition toward renewable energy, outdoor energy storage systems are emerging as game-changers. This article explores how innovative projects like the Japan Osaka ...

Japan is currently experiencing a historic phase when it comes to the development of solar energy infrastructure, as work begins on what will be Japan's biggest solar and battery energy ...

The Expo 2025 Osaka, Kansai, Japan is being held from April 13 to October 13, 2025. We highly recommend that you visit the Expo 2025 to see for yourself how cutting-edge technologies can ...

Utility Osaka Gas and developer Sonnedix are installing a battery energy storage system (BESS) at the latter's 38.7MW Oita solar project, which Osaka Gas described as the largest battery...

Japan is spearheading the development of two promising technologies to make optimal use of both the Earth and space and fully harness the Sun's power as electricity: space-based solar ...

If successful, OHISAMA could be the stepping stone to launching full-scale solar power stations in space, capable of generating up to 1 gigawatt of power--enough to run an entire city.
