A team of researchers from the Massachusetts Institute of Technology (MIT) and the University of Nairobi are designing affordable off-grid cold storage units for perishable crops in Kenya, using ...

The lack of battery storage for the solar power plants in Kenya has made it impossible to rely on the plants and boost supply to the national grid when demand peaks.

1 MW of power packed into a compact container, the ZBC 1000-1200 is the largest battery pack in our container range of energy storage systems. It demonstrates plug and play capabilities and are quick ...

Kenya has reaffirmed its commitment to accelerating solar energy deployment and integrating energy storage systems as part of efforts to strengthen grid reliability and meet rising ...

The Kenya Electricity Generating Company PLC (KenGen) is to implement a Battery Energy Storage System (BESS) project as part of a World Bank funded programme. The BESS ...

Industrial-scale energy storage systems for reliable power management and grid stability. Our Battery Energy Storage System (BESS) containers provide large-scale energy storage solutions designed ...

The hybrid project dubbed "the Meru County Energy Park" will be a large-scale facility that combines wind, solar PV, and battery storage. On completion, the facility is expected to feature up to ...

Both our container system and container expansions are often utilised in camping and glamping sites, construction sites, remote industrial units and anywhere that requires self-sufficient energy generated ...
