The utility is looking for developers who could design, build and operate the technology, which stores energy produced by power plants until it's needed to balance supply and demand.

Kingston Fossil Plant will become a state-of-the-art energy complex that includes natural gas, solar energy, and battery storage -- the first of its kind for TVA.

The Tennessee Valley Authority on March 7 said it is calling on the nation's premier Battery Energy Storage System developers to submit proposals for a 100-megawatt BESS system at ...

TVA issues Request for Proposals for a new utility-scale 100-megawatt battery storage system for its Kingston Energy Complex in Roane County, Tennessee. Interested developers should preregister at ...

The Tennessee Valley Authority is calling on the nation's premier Battery Energy Storage System (BESS) developers to submit proposals for a 100-megawatt BESS system at the utility's Kingston ...

The Tennessee Valley Authority (TVA) is calling on the nation's premier Battery Energy Storage System (BESS) developers to submit proposals for a 100-megawatt BESS at the utility's ...

That's where energy storage systems become the unsung heroes of renewable energy. Kingston's solutions act like a "power bank" for entire communities, turning sporadic green energy into reliable ...

TVA is building what it calls the Kingston Energy Complex, a combination of 1,550 megawatts of natural gas, 100 megawatts of batteries and up to four megawatts of solar panels.
