Almaty region continues to strengthen its role as a national leader in the development of renewable energy. As of today, the region is home to 23 operational renewable energy facilities with ...

In 2024, two power plants with a combined installed capacity of 34.5 megawatts were commissioned: a 20-megawatt solar power facility and a 14.9-megawatt hydroelectric power plant, ...

As Kazakhstan works towards decarbonizing its economy and achieving carbon neutrality by 2060, USAID aims to assess the challenges and opportunities for scaling up urban ...

In January 2014, the installation of a 2 MW ground-based solar power plant in Kapchagay, Almaty Province, was completed; it is the country's largest photovoltaic system to date [6].

A solar power station with a capacity of two megawatts was constructed there. 60 panels were installed to generate energy, they rotate following the sun movements during daylight.

The Nurgisa 100 MW Solar Park is a photovoltaic power station in Qonayev, Almaty Region, Kazakhstan.

Areas that would be most suitable for large-scale solar PV installations are those with flat terrain and unobstructed access to sunlight, such as the plains surrounding Almaty and its suburbs.

Kapshagay Universal Energy Solar PV Park is a 100MW solar PV power project. It is located in Almaty, Kazakhstan. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, ...
