What are EMS use cases?

Each use case was based upon the following principles: They are about a specific type of EMS activity (e.g. response to a medical emergency in a private residence, response to a multi-patient incident, response with multiple agencies to a vehicle crash, etc.).

How are EMS and public safety technology changing in 2025?

Communications Direct UHF Radios Emergency Medical Services (EMS) and public safety technology are rapidly evolving to meet the growing challenges of disaster response, event medical coverage, and everyday emergencies. As we enter 2025, new innovations are shaping the way first responders communicate, coordinate, and save lives.

How can public safety broadband support EMS response?

They identify the different public safety broadband capabilities needed to support EMS response (e.g., video consultation with a base station physician). They examine real time "tactical" uses as well as "strategic" uses of broadband data which will support both incident response and future analysis.

What is the joint EMS Communications & Technology Working Group?

The Joint EMS Communications and Technology Working Group brought together subject matter experts to examine the emerging role of advanced technology and its impact on EMS.

The National Public Safety Telecommunications Council (NPSTC) and the National Association of State EMS Officials (NASEMSO) Joint EMS Communications and Technology Working Group (Working ...

ZTE has developed airborne base stations mounted on uncrewed aerial vehicles to rapidly restore connectivity during natural disasters. These stations can support both private emergency networks ...

In this article, we explore the top EMS technology trends for 2025, including AI-driven dispatch systems, FirstNet advancements, next-gen radio communications, and enhanced ...

Abstract--An emergency communication system is necessary for first responders, who need to enter areas with no network coverage or damaged network infrastructure due to natural or man-made ...

We develop a prototype of a proposed mobile base station and test its operation in an outdoor environment. The experimental results provide a sufficient data rate to make an independent mobile ...

Latest Case Study of EMS for Communication Base Stations

Source: <https://studioogrody.com.pl/Wed-29-Mar-2017-6805.html>

When EMS communication is enhanced, teams can get detailed information to hospitals quickly, efficiently, and clearly, pre-hospital patient care is improved, door-to-treatment times are reduced, ...

This project seeks to connect all licensed EMS vehicles in the state of Maine to high-speed Internet using a rugged vehicle router with Wi-Fi, high-gain roof-mounted antenna, and FirstNet service by ...

One of the primary tasks for effective disaster relief after a catastrophic earthquake is robust communication. In this paper, we propose a simple logistic method based on two-parameter ...
