Large-scale solar developments are a relatively new development in New Zealand, and we can look to earlier adopters of solar (whether rooftop or utility-scale) for lessons on how to deal with ...

Distributed solar generation is expected to keep increasing, and New Zealand also now has some grid connected solar farm projects under construction, with more in the pipeline. The first ...

In New Zealand, Solar Panel installation is subject to product standards that ensure safe operation and an acceptable level of productivity. However, one concern that is often raised by people who are ...

Here we'll discuss how you can extend the life of your solar panel system, specific maintenance required, why degradation may occur, and other factors that affect solar panel lifespan ...

If you're planning to replace a solar panel, expand your array, or just have questions about the correct way to look after your panels for maximum life expectancy, get in touch with the ZEN Energy team ...

In 2023, commercial solar installations jumped 40% nationwide - and containerized systems led the charge. Why? They solve two pain points: upfront costs and limited space. We'll break down the ...

While uptake in New Zealand has been slower to date, there is potential for greater utilisation as technology costs decrease, particularly at the grid-scale and on commercial building rooftops.

Since solar PV containers use ordinary solar panels, their lifespan is largely dependent on the panels' lifespan. As such, it's possible to have a solar PV container effectively last for approximately 25 to 30 ...
