How much money does Portugal need to modernise its electricity grid?

Portugal: Portugal has unveiled a \$480 M (EUR400 M) investment package to modernise its electricity grid and significantly expand battery energy storage systems (BESS), following a major Iberian blackout earlier this year.

How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.

How much will Portugal invest in battery storage after Iberian blackout?

Portugal will invest \$480 M (EUR400 M) to strengthen grid stability and scale battery storage, aiming for 750 MW of BESS capacity after Iberian blackout.

How has Lisbon's storage policy changed over the past 18 months?

Policy has moved just as fast. In the past 18 months Lisbon introduced a streamlined licensing code, approved EUR100 M in Plano de Recuperação e Resiliência grants for 43 storage projects, and is drafting a 750 MVA capacity auction to go live before January 2026.

Portugal's BESS wholesale market sits at a unique crossroads. While Chinese manufacturers like BYD and CATL dominate global supply chains with EUR280/kWh factory prices, Portuguese installers still ...

Revenue stack for a 3-hour BESS in Portugal - Central Scenario A 3-hour BESS system allows for high revenue capture in the secondary reserve market especially during the first two years.

Battery Energy Storage Systems (BESS) are a game-changer in renewable energy. How much do a BESS cost per megawatt (MW), and more importantly, is this cost likely to decrease further?

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Battery Energy Storage Systems (BESS) are now central to the effective integration of renewable energy sources. As prices evolve, the Levelized Cost of Storage (LCOS) presents a clear ...

Portugal will invest \$480 M (EUR400 M) to strengthen grid stability and scale battery storage, aiming for 750

MW of BESS capacity after Iberian blackout.

This report analyses the cost of lithium-ion battery energy storage systems (BESS) within Europe's grid-scale energy storage segment, providing a 10-year price forecast by both system and ...

The latest Clean Horizon Portuguese price forecasts (S1 2025) have been available since March 2025! Recent advancements in battery energy storage system (BESS) technologies ...
