The 5-MW demonstrator with integrated energy storage will be the world's largest offshore floating solar power plant. The hybrid offshore wind and offshore floating solar project is ...

The construction of the world's largest floating offshore solar power plant has begun. The groundbreaking start signals a monumental advancement in renewable energy efforts.

Today, the startup is partnering with German energy firm RWE to build a pilot floating photovoltaic (FPV) plant that will open in the Belgian North Sea next year.

On August 16, Typhoon Ampil hit the region near Tokyo, causing strong winds and heavy rain. Despite these adverse conditions, SolarDuck's floating solar power plant proved highly resilient ...

Little Duck Solar provides a comprehensive array of solar products aimed at meeting diverse consumer needs. This includes residential solar panels, solar energy storage solutions, and ...

At SolarDuck, we are building on our Dutch-Norwegian roots and pioneering the future of renewable energy by harnessing the power of offshore floating solar technology. In many regions, solar energy ...

Little Duck Solar's offerings exemplify a strong commitment to quality, aligning modern solar solutions with an environmentally sustainable future. Ensuring durability, efficiency, and ...

In April 2021, SolarDuck launched its first plant, a river-based installation that allowed us to test the basic design and assembly strategies, as well as multiple types of solar modules. Following this success, a ...
