-----

Little Sun has provided solar energy for water pumping, staple crop processing, cold storage, and food drying to help increase agricultural productivity for smallholder farmers.

What started as a humble idea to create a small, portable solar lamp for people without electricity in Ethiopia is now a global project that has changed over a million lives through the awesome power of ...

To date, Little Sun has provided clean power and light to over 3.2 million people in Sub-Saharan Africa, enabled 58 million additional study hours for children, saved households \$150 million in expenses, ...

You literally hold the power of the sun in your hand -- it's very tangible. The design of the Little Sun Original was inspired by the Ethiopian meskel flower, which is a national symbol of ...

Today, Little Sun works together with communities living without electricity to test and implement ways to use solar power in Sub-Saharan Africa, building a solar-powered offering for rural smallholder ...

By working with communities, businesses, civil society, and governments, Little Sun delivers affordable clean energy solutions to those who need it most. Solar energy enables children to study at night. ...

The non-profit organisation Little Sun, a climate-conscious initiative founded by the Danish-Icelandic artist Olafur Eliasson and the engineer Frederik Ottesen, is commemorating Earth Day today...

Now, we're shifting our focus to the future: the Little Sun Community Energy Hubs.
