With renewable energy sources like solar and wind becoming the Meryl Streep of climate solutions (always nominated, finally winning), strategic partnerships in energy storage are no longer ...

The Long Duration Energy Storage (LDES) program invests in projects that accelerate the implementation of long duration energy storage solutions to increase the resiliency and reliability ...

This paper offers a thorough examination of Long-Duration Energy Storage's (LDES) critical role in reaching net-zero emissions, emphasizing the need for cross-border cooperation in ...

Long-duration energy storage (LDES) will play an increasingly important role in decarbonizing the power sector as more variable renewable energy is added to the electric power grid. LDES is defined by the ...

The forecast need of energy storage for the next 15-20 years is being mostly driven by renewable energy goals, carbon policies, economic conditions, and the retirement of conventional generation ...

Our analysis provides strong support for the future value of Antora Energy's BESS for military installations and moving forward with near-term field demonstration(s) on military installations.

"The most detailed guide yet to how the Biden administration plans to conduct industrial policy for the most advanced -- and the most fledgling -- energy technologies in its arsenal."

The energy transition won't be powered by better batteries alone. It's about creating storage systems that play well with others - and frankly, that's where the real revolution's happening.
