MGE is committed to growing our use of renewable resources, including solar energy, as we work to reduce the carbon intensity of our electric generation. See our current and proposed solar projects.

Madison Solar Farm is a ground-mounted solar project which is planned over 400 acres. The project is expected to generate 4,372,381MWh electricity and supply enough clean energy to ...

This solar giant features 830,000 double-sided solar panels on moving structures, capturing solar energy all day long and even during winter when sunlight bounces off the snow. With ...

Overall, Madison's latitude and seasonal variations make it a viable location for solar power generation with proper installation techniques and ongoing maintenance practices to ...

MadiSUN is the City of Madison's initiative to expand solar energy for homes, businesses, and nonprofit organizations. For 2025, two programs are available to help grow solar in Madison.

The facility, comprised of 830,000 solar modules, is large enough to power the equivalent of 90,000 homes. The tracker-mounted project includes bifacial panels, enabling the solar panels to ...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

The City of Madison has installed over 46 solar electric (PV) systems at 39 sites throughout the City since 2008, ranging in size from 2.36 to 480 kW.
