We provide important information on all the upcoming/announced grid-scale/utility scale energy storage system (ESS) projects in Equatorial Guinea, including project requirements, timelines, ...

The facility under consideration is designed for an initial annual capacity of approximately 2 GWh, with a focus on utility-level and commercial & industrial (C& I) battery energy storage systems (BESS) that ...

Equatorial Guinea's oil revenues could either boost or bottleneck energy storage development in Malabo. While some argue for "green transition" investments, old habits die hard. The real plot twist? ...

Summary: Explore how Equatorial Guinea's 20MW energy storage project is revolutionizing renewable energy integration and grid stability. Learn about its technical innovations, environmental impact, and ...

While batteries dominate current talks, green hydrogen storage is creeping into conversations. Energy Undersecretary Juan Pablo recently hinted at pilot projects combining solar, batteries, and hydrogen ...

Antonio Oburu Ondo, Equatorial Guinea's recently appointed Minister of Mines and Hydrocarbons, has awarded independent exploration and production company, Panoro Energy, a 56% participating ...

Focused on sustainability and innovation, esVolta develops, owns, and operates reliable utility-scale energy storage assets across the entire lifecycle - delivering value for utilities, energy users, and ...

Equatorial Guinea's lithium battery energy storage sector is thriving, driven by innovative companies addressing both urban energy poverty and industrial demand.
