Beyond energy efficiency, liquid cooling also transforms space economics. By enabling 200 kW within a single rack, operators can concentrate compute into significantly smaller footprints.

The ColdLogik(TM) water cooled server rack solution allows cooling water temperatures to rise from the traditional 6°C to between 14°C and 21°C; reducing chiller size, energy costs and increasing the ...

Discover how Schneider Electric rack PDUs provide server level power availability with a variety of power metering and control options as well as environmental monitoring capability.

Learn how kW per rack impacts colocation pricing, energy efficiency, and performance. Discover best practices to manage power, reduce costs, and future-proof your IT infrastructure.

On June 27, during National Energy Day, representatives from the Dutch data center industry signed off on a measure that will save more energy than the output of 1 million solar panels. ...

The CHx200 is a rack-based CDU, built for the needs of today's most demanding HPC and enterprise server requirements. Capable of managing 200 kW of heat load in a remarkably small 4U of space, ...

The company also demonstrates the ambition to make a substantial contribution to energy savings for its own servers and those of customers housed in its data centers in the Netherlands. This guide ...

This compact 4U CDU is equipped with unique immersion pumps and delivers over 170-200kW heat transfer capacity. It is a perfect solution to provide responsive, high-capacity cooling for high ...
