When installing photovoltaic (PV) systems, most businesses focus on energy savings and environmental impact. But here's the shocker: 68% of solar adopters make costly accounting errors in their first ...

As solar and other renewable energy industries experience significant growth, it's a good time to consider these hot accounting topics and ask the following questions:

The Solar Billing Plan (SBP) is a new program for customers who apply for interconnection of an eligible renewable generating system, such as solar or wind, after April 14, 2023.

Under the plan, the way solar works for your property depends on how much electricity you generate and how much electricity you use. Solar energy credits are valued by the season, month, day, and ...

Responsible and cost-effective dissolution of photovoltaic (PV) system hardware at the end of the performance period has emerged as an important business and environmental consideration.

On April 15, 2023, NEM 2.0 closed to new customers and a new Solar Billing Plan went into effect. NEM accounts will continue to bill under the current NEM program until the 20-year period expires, or until ...

In recent years, VPPAs have emerged as a flexible tool through which a buyer can support the renewable energy market, offset its electricity use from traditional sources, and meet its ...

We propose to renumber Account 509 (Allowances) to Account 509.1, delete the reference to sulfur dioxide in this account, and create two new expense accounts for RECs: Account 509.2 ...
