Will India's first standalone battery energy storage system be operational soon?

New Delhi, Mar 17 (PTI) The country's first commercially-approved standalone battery energy storage system (BESS) capable of four-hour daily supply being set up at Kilokri in South Delhi will become functional soon, power company BSES said on Monday.

What is India's 'first commercially approved' energy storage system?

The system is also India's 'first commercially approved' utility-scale energy storage system that will ensure improved power supply in different south Delhi areas, covering a population of over one lakh people, according to a statement from power discom BRPL (BSES Rajdhani Power Limited).

How many hours a day can a energy storage system deliver?

'The energy storage system is designed to deliver up to four hours of reliable daily power--two hours each during the day and night--directly benefiting over one lakh residents in the densely populated Kilokri area in south Delhi,' it stated.

NEW DELHI | 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) project, the ...
