Distributed solar generation is expected to keep increasing, and New Zealand also now has some grid connected solar farm projects under construction, with more in the pipeline.

Sungrow, a provider of photovoltaic inverters and energy storage systems, will deliver and commission its inverter technology for the Tauhei Solar Farm, which is claimed to become the ...

Harnessing the sun's energy to power New Zealand's zero carbon future. Our first five solar farms will generate enough energy to power 50,000 homes, or a city the size of Hamilton. And we're not ...

New Zealand's commitment to renewable energy, combined with technological advances in solar panels and inverters, makes 2025 a great time to go solar. Whether you are a homeowner ...

Sungrow, a provider of photovoltaic inverters and energy storage systems, will deliver and commission its inverter technology for the Tauhei Solar ...

Solar power is increasingly important to New Zealand as it provides a low-cost clean, renewable energy source. However, intermittent generation like solar and wind must be accurately ...

Inverters are the device that turn the direct current (DC) produced by your solar panels into the alternating current (AC) you use in your house or business. Current Generation will work with you to ...

OverviewInstallations by typeCost-effectivenessSee alsoExternal linksSolar power in New Zealand is a small but rapidly growing contributor to the country's electricity supply. In 2024, 601 gigawatt-hours of electricity was estimated to have been generated by grid-connected solar, 1.4% of all electricity generated in the country. As of the end of September 2025, New Zealand had 792 MW of grid-connected phot...
