As the need for large-scale renewable energy continues to climb, ground-mounted solar systems are set to sustain their prominent role in the North American solar power market, contributing significantly to ...

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

Launched in 2016, NARIS evaluated four scenarios for North American power systems through 2050, focusing on the effects of various renewable technology cost trajectories, emission ...

The North America solar PV market is experiencing robust growth, driven by rising renewable energy adoption and government incentives promoting clean energy. Technological advancements in high ...

This continent databook contains high-level insights into North America solar energy systems market from 2019 to 2030, including revenue numbers, major trends, and company profiles.

By grid type, on-grid installations held 96.12% of the North America solar photovoltaic market share in 2025, while off-grid systems are advancing at a 21.30% CAGR through 2031 as ...

By Q3 2024, the nation's cumulative solar capacity reached an impressive 209.8 GW, marking a significant expansion, especially in the utility-scale segment.
