Solarfold allows you to generate electricity where it's needed, and where it pays to do so. The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of ...

The off-grid version consists of a Solarfold container which, in conjunction with a suitable additional storage container, is not connected to the public power grid and functions completely autonomously.

Learn about the benefits of solar container homes and how they provide reliable off-grid energy through modular energy storage, hybrid energy compatibility and rapid deployment.

Whether deployed as a standalone microgrid or part of a larger portfolio, our containerized systems ensure rapid installation, guaranteed reliability, and the resilience needed for extreme environments.

Maxbo's containerized systems enable industries to store energy during off-peak periods and use it during peak demand, reducing their exposure to fluctuating energy prices.

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

Discover off-grid renewable energy solutions, products, and services for reliable power in remote locations. Empowering energy independence worldwide since 2010.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...
