BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged ...

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have ...

The price of battery packs has decreased by 75 percent in the last 10 years, as this energy storage technology has become increasingly important in the electric mobility and renewable energy...

What's driving the latest trend in battery prices? Explore falling costs, LFP adoption, and regional dynamics shaping 2025 markets. Click for insights!

Understand why EV battery prices have been decreasing over the last few years. Get S& P Global Mobility's forecasts for EV battery cell prices through 2030.

Lithium-ion battery pack prices dropped 20% in 2024, reaching \$115/kWh. EV battery prices dip below \$100/kWh--explore the trends behind this decline. Declines in the cost of lithium-ion ...

According to BloombergNEF's 2025 Lithium-Ion Battery Price Survey, lithium-ion battery pack prices have fallen 8% since 2024, reaching a record low of \$108 per kilowatt-hour.

BNEF expects pack prices to decrease again in 2026, based on its near-term outlook, as raw material prices face upward pressure but adoption of low-cost LFP continues to spread.
