The 2020 target was met, and Paris is on track to achieve the 2030 emission reduction target. By the end of 2024, the city had reduced GHG emissions by 35% compared to 2004 levels.

By 2030, Paris will have removed 60,000 parking spaces and replaced them with trees. That's one of the goals outlined in the French capital's new 2024-2030 Climate Plan, which was ...

The Olympic and Paralympic Games Paris 2024 achieved an unprecedented 54.6% reduction in carbon emissions compared to previous editions, as detailed in the newly published ...

France's most famous and populous city has been working to become sustainable since the mid 2000's. Le Plan Climat de Paris was adopted in 2007 and targeted a 25% reduction in greenhouse gas ...

To address the threat of climate change, the Paris Agreement was adopted in 2015 to limit global temperature rise over pre-industrial levels to well below 2 °C, while striving to keep it below...

Unlike earlier climate deals, Paris does not impose fixed emissions cuts on countries. Instead, it created a system where each nation sets its own climate plan, known as a nationally ...

To stay in line with the new EU objective of a 55 % net emissions reduction, France must consider reducing its emissions by 5 % per year between 2022 and 2030 and substantially increasing its ...

As the main document for Paris' ecological planning, it sets out the goals, guidelines and action plan to reduce greenhouse gas emissions, improve air quality and help the population to adapt to the ...
