How ACEN is revolutionizing energy solutions in the Philippines?

ACEN is revolutionizing energy solutions in the Philippines with cutting-edge battery storage projects. These initiatives are tailored to enhance grid reliability, allowing for smoother integration of renewable sources and providing critical backup during peak demands.

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

Why is ACEN redefining energy transition in the Philippines?

Each project is a step forward in our mission to deliver efficient and sustainable energy solutions across the region. ACEN is redefining energy transition in the Philippines through the strategic implementation of advanced energy storage systems co-located in some of its renewable energy projects.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

The booming green revolution and increasing demand for sustainable energy solutions have resulted in the significant growth of the energy storage industry in the Philippines. From ...
