---

It consists of hot-dip galvanized steel pipe piles with spiral blades under both the front and rear columns of the photovoltaic brackets. The spiral blades can vary in size, and can be continuous ...

The invention further discloses a production process of the spiral ground pile of the photovoltaic support.

The photovoltaic spiral pile can effectively adapt to a variety of geological conditions due to its unique design. Whether it is a hard rock layer or a soft soil foundation, the photovoltaic spiral pile can ...

We have an annual processing capacity of 12000 tons, mainly engaged in deep processing of steel pipes, photovoltaic pre buried piles, production of various types of spiral piles, hot ...

Photovoltaic support foundations are important components of photovoltaic generation systems, which bear the self-weight of support and photovoltaic modules, wind, snow, earthquakes and other loads.

Photovoltaic screw ground pile can reduce the cost of the foundation of the support system, shorten the installation time, and reduce the environmental impact of the ground photovoltaic support system.

Yuhao PV ground piles, relying on core technologies of hot-dip galvanizing and spiral strong support, have become the preferred foundation solution for major PV projects, creating a reliable &quot;root&quot; for ...

Courtyard spiral pile hot-dip galvanized photovoltaic solar support, find complete details about Courtyard spiral pile hot-dip galvanized photovoltaic solar support, 60mm / 76mm / ...
