Can storage replace thermal generation in Portugal?

The pursuit of economic viability by storage facility owners will inherently lead to charging during low-cost hours and discharging during hours that are more economically attractive. Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target.

Why is storage important in Portugal?

Storage provides real-time flexibility, enabling participation in balancing markets and maintaining grid stability and inertia, especially in Portugal where these markets are growing. Despite the increase in interconnection capacity between Spain and Portugal, it could experience congestions during non-solar hours.

How many hybrid storage projects are being deployed in Portugal?

Additional hybrid capacity is being deployed, namely by Iberdrola, Greenvolt, Akuo, EDP and GALP, supported by Portugal's Recovery and Resilience Plan (PRR) programme under the "Flexibility and Storage" incentive call. Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants.

How much electricity does Portugal generate in 2025?

In the period from January to August 2025, Portugal generated 33,107 GWh of electricity, with renewables accounting for 76.9% of total generation--the fourth-highest share in Europe, following Norway, Denmark, and Austria.

Storage can increase self-consumption during non-solar hours, aligned with Portugal's 2030 goals (5,7GW). The seasonality of consumption in certain locations in Portugal, such as ...

As renewable energy adoption accelerates globally, Lisbon emerges as a strategic hub for innovative containerized energy storage systems. This article explores how modular energy storage solutions ...

Why Porto is Leading in Energy Storage Innovation Porto, Portugal's vibrant industrial hub, has emerged as a hotspot for Battery Energy Storage Container (BESS) adoption. With its growing reliance on ...

Portugal Energy Storage Market Top 5 Importing Countries and Market Competition (HHI) Analysis Portugal's energy storage import market in 2024 continued to be dominated by key exporters such ...

From ESS News Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production. To this end, the country's Ministry ...

Summary: Portugal is accelerating its transition to renewable energy with groundbreaking storage technologies under the "Portugal 2030" initiative. This article explores cutting-edge solutions, ...

Why is storage important for the energy transition in Portugal? With 21 318 GWh of electricity generated in Portugal between January and June 2022 - 57% of which of renewable origin - storage will be ...

**PORTUGUESE STORAGE AS OF TODAY** Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems ...
