Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and improve the ...

Adding BESS to power generation companies" (gencos) capacity generation mix could help diversify energy sources and stabilize cash flows. However, the shorter useful life of BESS and ...

A new power sufficiency regulation, which essentially operates as a capacity mechanism - a method of securing enough generation and storage assets to guarantee electricity supply - is ...

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable ...

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity payment for ...

This case study explores how battery storage systems (BESS) are solving intermittency challenges while creating new opportunities for industrial and residential users.

As a leading provider of energy storage solutions, SunContainer Innovations has been instrumental in deploying modular battery systems across Valparaiso. Their technology enables seamless ...

Nestled in Chile's Coquimbo Region, the Valparaiso wind and solar energy storage power station sits strategically near the Pacific coast. This location capitalizes on two critical resources: consistent ...
