Does EQUIS have a Bess project in Korea?

Equis is successfully leveraging its extensive BESS track record in Korea, having owned and operated a 207MWh peak-shaving BESS project in Incheon and Pohang, the largest in Korea at the time, as well as currently operating a 75MWh solar-connected BESS project in Sinan County.

Will KKR and LG join a Bess project?

The venture will combine LG's battery manufacturing capabilities with KKR's infrastructure financing to jointly bid for large-scale BESS projects overseen by the government.

What does the 2025 Bess tender mean for Korea?

The 2025 tender builds on the government's initial foray into centralized BESS contracts, launched in 2023 with a 65MW, 4-hour project on Jeju Island. That project represented a turning point, establishing a new model for how low-carbon resources can be procured and integrated into Korea's power system.

How many companies are involved in the Bess project?

In total, 14 companies were involved, including HD Hyundai Electric, Hyosung Heavy Industries, LS Electric, Samsung SDI, LG Energy Solution, and others. HD Hyundai Electric announced the completion and start of operation of its 336MW BESS for the utility a couple of months ago.

The government ministry announced the plan this morning. It aims to procure 540MW of grid-connected battery energy storage system (BESS) technology to help resolve power grid ...

The Ministry of Trade, Industry and Energy unveiled plans for a nationwide tender to install 540 megawatts of battery energy storage systems (BESS), marking the country's first major ...

KEPCO, South Korea's biggest electric utility, has welcomed the start of commercial operations at a portfolio of large-scale battery energy storage system (BESS) assets.

Korea Southern Power Co. announced on the 3rd that it has begun construction of the central contract market-type battery-type cycle BESS (Battery-ESS) for the first time in Korea to ease ...

South Korea's latest tender sends a clear signal: energy storage is no longer a peripheral technology--it's central to grid reliability, emissions reduction, and the broader energy ...
