This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, ...

Romania's wind power with energy storage initiative represents a blueprint for balancing renewable growth with grid stability. Through strategic technology deployment and market incentives, the 2025 ...

The National Energy System is taking important steps towards sustainability, with high-performance wind turbines and investments in local batteries. After an episode of record energy ...

Romania is expected to launch its first onshore wind auction in November. It's for 1.5 GW new capacity. They're offering 2-sided CfDs supported by EU funding. The price ceiling is EUR82/MWh. ...

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's ...

The ambitious goals were announced by Energy Minister Sebastian Burduja, in line with recommendations and analyses by domestic transmission system operator Transelectrica. The latter ...

An advanced EMS can manage multiple consumption units - such as buildings, factories or logistics centres - and connect them to common production sources, such as a photovoltaic or ...
