-----

Positioned less than 1,000 miles south of the equator, American Samoa is positioned to harness its abundant solar energy resources. Energy storage is expected to play an important role in ...

BESS projects will be critical for American Samoa to achieve its renewable energy goals by maximizing solar utilization, reducing dependence on imported fuels, and ensuring a safe, reliable ...

Constructed by Eastern Power Solutions, the solar-plus-storage projects will provide 10 MW / 20 MWh of critical clean capacity for the American Samoa grid.

Located on Tutuila and Aunu'u islands, the three solar-plus-storage projects have capacities of 4 MW/8 MWh, 5 MW/10 MWh, and 1 MW/2 MWh. These systems stabilize solar power ...

In collaboration with Eastern Power Solutions (EPS), a turn-key solar energy service provider, the solar-plus-storage projects will support American Samoa Power Authority's (ASPA's)...

The 2-hour duration BESS marks the first of three projects that EVLO will be commissioning in the territory, in collaboration with solar energy service provider Eastern Power ...

In 2016, the American Samoa Renewable Energy Committee (ASREC) set a goal to achieve 100% renewable energy by 2040, primarily through solar. The territory's high solar exposure supports this ...

The first of three storage projects is completed, enabling the island to integrate its solar energy production and enhance grid reliability. Evlo Energy Storage Inc, a subsidiary of Hydro ...
