Is F-grid solar lighting a success in Papua New Guinea?

f-grid solar (OGS) lighting in Papua New Guinea (PNG) is a success story. Since 2012, sales have grown at an annual average rate of 68 percent, increasing market penetration from 2 to 60 percent of households. PNG today has one of the highest prevalence rates of use of off-grid solar lighting in the world. It is due to several factors.

Is solar energy a viable option for Papua New Guinea?

The viability of this approach is underscored by substantial recent growth in the global solar energy market. For more information on solar's global rise, see this article: [Solar Energy Growth: Stunning 34% Surge in 2024](#). Solar energy is particularly suitable for Papua New Guinea, as the country receives abundant sunlight throughout the year.

Why is Papua New Guinea launching a solar project?

The solar project in Katima is just the beginning of Papua New Guinea's renewable energy journey. As more initiatives are launched and more communities gain access to clean electricity, the nation moves closer to a brighter, more sustainable future.

How much does Papua New Guinea spend on solar lighting?

ion per year and will grow over the next five years. While the Government of Papua New Guinea (GoPNG) plans to invest in grid electrification, enough disposable income to purchase lighting products, spending on average about \$192 a year. The addressable market encompasses 10 percent of PNG's households own off-grid solar lighting, making it the second

From the design stage we will take you step by step through the process of safely designing your off-grid solar, wind (Solar + Wind + Generator) system. We believe that anyone living or creating off-grid ...

In a new paper, we explore why PNG's grid has struggled to expand, what role decentralised solar could play and how other countries have overcome similar challenges.

With the objective to increase access to reliable electricity, renewable and hybrid mini-grids represent a vital opportunity to strengthen energy security, reduce dependency on imported ...

Firms like Aptech Africa have implemented several solar energy systems across the country, including off-grid and hybrid solutions. You can read more about their work in the article ...
