When the power goes out, solar panels may or may not work. It completely depends on your system. This article will tell you what you need to keep the power on.

Understanding the various components of a PV system and their specific requirements is crucial for safely taking it offline. Here's a look at some key considerations:

Learn maintenance tips, real-world cases, and future-proof solutions for offline solar panel equipment. What's Behind Your Solar Panel Equipment Going Offline? You know that sinking feeling ...

What do I do if my PV shows offline? The inverter displays PV Offline. This error occurs on PWRcell systems. Perform a full reset on the system, see the How do I reset my PWRcell system? article for ...

Do solar panels work during power outages? See how grid-tied PV behaves, and how batteries, hybrid inverters, and off-grid options keep backup power on.

Have you checked simple things like solar PV branch circuit breakers, AC disconnects, junction boxes? Maybe call your installer? Or find one here: [enphase /installer-locator](#) You can call Enphase ...

If your panels have been offline or underused, we'll help assess their condition, recommend smart upgrades, and ensure they're ready to power your home efficiently again.

If solar panels are left disconnected from a solar photovoltaic system, they will not be able to produce electricity or be effectively utilized in an energy system.
