How does the European Commission support the solar sector?

The European Commission has stepped up its efforts to support the solar sector in Europe through the European Solar Charter, signed by energy ministers from 23 EU countries and industry representatives, setting out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

What is the EU solar energy strategy?

As part of the REPowerEU plan, in May 2022 the Commission adopted an EU solar energy strategy, which identifies remaining barriers and challenges in the solar energy sector and outlines initiatives to overcome them and accelerate the deployment of solar technologies.

What is the EU doing with solar energy?

The EU funds many solar cell projects, such as the PERTPV project, in which perovskite-based materials were used to build a new type of solar cell. Photovoltaic technology is becoming more widely used worldwide. Year after year, photovoltaics make up a bigger share of the EU's energy mix.

How does Europe support solar power expansion?

Together with the European Data Journalism Network, DW has analyzed how Europe's governments support the continent's solar power expansion. How did solar become so popular so fast? Today, several EU countries host a capacity of around a kilowatt -- roughly two solar panels -- per person.

The EU's electricity transition reached a new milestone in 2025 with wind and solar generating more power than fossil fuels.

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

As part of the REPowerEU plan, in May 2022 the Commission adopted an EU solar energy strategy, which identifies remaining barriers and challenges in the solar energy sector and outlines initiatives ...

The EU has doubled its solar capacity in the last three years. How have subsidies made this possible, what support is still available, and what still needs to happen?

The EU is "rapidly" moving towards a clean energy future, but experts warn our "outdated" grid is holding us back. Wind and solar generated more EU electricity than fossil fuels for ...

BRUSSELS/BERLIN, July 24 (Reuters) - The European Union's expansion of solar energy is on track for its first annual slowdown in more than a decade, industry data showed on Thursday, as some...

The European Commission has stepped up its efforts to support the solar sector in Europe through the European Solar Charter, signed by energy ministers from 23 EU countries and ...

The EU has doubled its solar capacity in the last 3 years. DW and the European Data Journalism Network have analyzed how subsidies made this possible, what supports are still ...
