Torque tubes are typically circular, square, pentagonal, octagonal, or D in shape and coated with galvanizing. The torque tube connects all PV modules, ensuring that they all track the sun's path ...

Apollo Octagon is a range of exclusively designed tubes that are widely used in furniture, railings, solar panels, and lighting poles. These tubes are designed for easy fabrication and are fancy in looks.

PandaPipe produces solar torque tubes that are guaranteed to be connected to all photovoltaic modules to synchronously track the sun's path. Unlike traditional galvanized pipes, PandaPipe products have ...

Solar Torque Tube Cable Hanger - Octagon Quick snap on torque tube hanger with single pocket for managing cables. Hot dipped galvanized, stainless steel or powder coat. Available in multiple sizes ...

Torque tube systems are at the core of tracker architecture, and they not only support the motion of solar panels on a solar farm, they provide a platform for routing cables. Torque tube brackets have no wire ...

S& P Steel supplies square and octagonal torque tubes for the construction of solar panel mounting systems and supporting structures.

Solar panels can be quite heavy, and they need to be mounted securely to withstand wind and other weather conditions. Steel tubing provides a strong and sturdy foundation for solar panel mounting ...

Our high-quality round, square, octagonal, and swaged torque tubes are designed for durability, precise alignment, and seamless operation, ensuring the highest performance standards for your solar projects.
