What is aluminium curtain wall?

Aluminium curtain wall is a versatile and high-performance building system that is designed to provide a seamless and sleek exterior finish. This type of system is composed of a series of mullions and transoms that are made from aluminium extrusions, which are connected together to create a grid-like structure.

Are aluminium panels suitable for curtain walling?

For curtain walling especially, aluminium panels are very popular. There are generally two types of curtain walling systems, capped and structural silicone. Both types of curtain wall glazing methods can accommodate aluminium panels. Aluminium Panels for curtain walling with capping.

What are the benefits of aluminum curtain wall profiles?

In addition to their structural benefits, our aesthetic aluminum curtain wall profiles enhance the overall look of any building. With options for powder coated aluminum extrusions and anodized aluminum curtain wall systems, you can achieve a sleek finish that complements your design vision while adhering to sustainable practices.

What are aluminum extrusion profiles for curtain wall systems?

Our extensive range of aluminum extrusion profiles for curtain wall systems is engineered to meet the diverse needs of commercial buildings, ensuring structural integrity while enhancing visual appeal. Our high-performance aluminum extrusions are designed for durability and versatility.

Haomei aluminum extrusion profiles for curtain wall systems provide durability and aesthetic appeal for modern architecture for both residential and commercial projects.

WHAT IS A CURTAIN WALL? Curtain walling refers to a non-structural cladding system made from fabricated aluminum, commonly used on the outer walls of tall multi-storey buildings.

Curtain walls are an excellent way to bring natural light into a room while still remaining protected from the elements. Many providers often shy away from unique curtain wall projects that ...

The aluminum alloy's inherent strength allows for the creation of large-span curtain wall systems without compromising on safety. Lightweight Design: Despite their strength, these ...

Our aluminium curtain walling systems enhance aesthetics and provide the functionality and performance required for contemporary construction approaches. For every project on which we ...

Aluminum composite panel (ACP) curtain wall systems are composed of two aluminum sheets bonded to a non-aluminum core, offering a lightweight, flat, and cost-effective solution for ...

Jiangyin East Technology Aluminum Co.,Ltd is a specialized large-sized enterprise integrating research, design, production and sales of aluminum alloy profiles for building industrial applications and ...

Ongoing research and development in aluminium alloys and surface treatments continue to expand the capabilities of curtain wall systems. New coating technologies offer enhanced ...
