The global solar inverter industry will contract over the next two years as markets in China, Europe and the US confront new volatility.

In Q3 2025, the residential segment installed 1,088 MWdc of solar capacity, declining 4% year-over-year and quarter-over-quarter. Despite an industry rush to bring projects online this year to ...

The Solar PV Inverters Market, valued at USD 12.74B in 2026, is projected to reach USD 25.2B by 2032, growing at a 11.9% CAGR.

After record shipments in 2024, the global solar inverter market is set for a two-year downturn, shrinking 2% to 577 GWac this year and another 9% to 523 GWac in 2026, according to ...

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital ...

A gradual but constant drop in prices is expected to lower revenues for solar inverter market players and act as the significant constraining factor for the market.

The recent residential solar industry downturn in the United States and Europe has required some inverter manufacturers to close down operations and cut jobs.

Wood Mackenzie's latest analysis expects market uncertainty in China, Europe and the U.S. to cause two consecutive years of contraction in the global solar inverter market, forecasting a ...
