Which countries dominate solar module manufacturing?

According to Wood Mackenzie's report, China continues to dominate the solar module manufacturing landscape in terms of scale, but emerging challengers from India, South Korea, and Vietnam are rapidly closing the gap as global production becomes more geographically diverse.

Does China have a dominance in the solar PV manufacturing market?

While China's dominance in the solar PV manufacturing market is unmatched, it has challenges. The industry has been grappling with significant overcapacity despite phenomenal growth in domestic solar installations and in export volumes.

Will global solar PV manufacturing capacity constrain scaling deployment?

Global solar PV manufacturing capacity projections indicate that supply will not constrain scaling deployment. The IEA itself projected that by 2030, the world would have 1,615GW of annual solar PV manufacturing capacity, with most developed in China -- Figure 1.21.

How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe - and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...

Each year, Wood Mackenzie answers this question with an analysis of the 40 largest solar panel brands across 10 countries. These companies alone account for 62% of global ...

CEF notes the IEA consistently underestimates the pace of the global solar PV, BESS and electric vehicle (EV) disruption and the growth in manufacturing capacity. Analysing market trends, ...

Discover which companies are producing the highest number of solar panels around the world, ranked from

ninth to first.

Discover the top solar panel manufacturers in 2025. Compare global leaders with US producers and explore wholesale sourcing options.

Which are the top 10 solar panel manufacturers worldwide for 2026? Find out who is producing the most solar panels: China, India, or the USA?

The world's top 10 solar photovoltaic (PV) module manufacturers shipped a record 500 gigawatts (GW) of modules in 2024, nearly doubling the previous year's volume, according to Wood ...
