Did solar power increase faster than electricity demand in the first six months?

Worldwide solar and wind power generation increased faster than the growth of electricity demand in the first six months of the year, according to a new analysis. (Produced by Juli&#225;n Trejo Bax) By ALEXA ST. JOHN

How has global solar generation changed over the years?

Global solar generation grew by a record 31% in the first half of the year, while wind generation grew by 7.7%, according to the report by the energy think tank Ember, which was released after midnight Tuesday London time.

When was solar power first used?

In the late 1700s and 1800s, researchers and scientists had success using sunlight to power ovens for long voyages. They also harnessed the power of the sun to produce solar-powered steamboats. Ultimately, it's clear that even thousands of years before the era of solar panels, the concept of manipulating the power of the sun was a common practice.

Are solar and wind power generating more power than coal?

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated more power than coal, according to a new analysis.

For the first time on record, renewable energy generated more electricity for the planet than coal, a new report says.

The world generated almost a third more solar energy in the first half of the year compared with the equivalent timeframe in 2024, meeting over four-fifths of the global increase in ...

For the first time in history, renewable energy has produced more of the world's electricity than coal, according to a new analysis of global energy trends. In the first half of 2025, solar and ...

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated more power than coal, ...

It's easy to forget that going solar had a different meaning even just a decade ago. Learn more about the history of solar energy and ...

Is solar power going to take over the world? The past few years have seen a frankly astounding acceleration in the rate of its deployment, with total generation capacity doubling between ...

For The First Time Ever, Renewables Have Overtaken Coal In Global Power Generation For the first time on record, renewable energy from solar and wind produced more electricity than ...

Top energy news: Solar set to exceed nuclear for the first time; LFP batteries fuelling energy storage boom; IEA warning on copper demand.
