A proposed class action lawsuit accuses utility giant PG& E Corporation, subsidiary Pacific Gas & Electric Company and several other entities of luring consumers into taking out loans ...

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll ...

Fueled by a drop in solar panel costs, an urge to fight climate change, the availability of real but sometimes confusing government incentives and a desire to save on rising energy bills, solar ...

Like any industry experiencing rapid growth, the solar sector isn't immune to unscrupulous practices and solar fraud. While most solar companies and representatives operate with integrity, homeowners ...

In the piece below, Jonathan Lesser traces the history of wind and solar subsidies in the US and why every dollar shovelled into the occasional generation of electricity is a dollar wasted.

Enormous subsidies for solar and wind generation technologies are proving much more expensive than advertised. They also carry hidden costs and burdens on the grid, most recently seen ...

Rapidly increasing demand for sustainable energy sources has sparked an explosion of alternative energy companies, especially in the residential solar market. This development has ...

The false claims assessed in the report cover a wide variety of arguments against solar development. These include factually inaccurate arguments related to human health, the ...
