The history of solar energy is an American success story. Since the creation of the first silicon solar cell 70 years ago, solar leaders have been innovating, improving efficiency, lowering ...

By showcasing solar power through events like parties and parades, Sun Day intends to show that renewable energy is not out of reach for average homeowners.

In 1978, President Jimmy Carter proclaimed May 3 as "Sun Day," and people across the country celebrated the dawn of the "solar age." In Washington, D.C., the event drew 20,000 people, ...

On June 20, 1979, President Jimmy Carter --sporting a bushy haircut and a wide necktie--invited dignitaries and reporters onto the roof of the White House to watch the installation of ...

The first observance of Sun Day--during which solar energy was promoted internationally in speeches, rallies, celebrations, and demonstrations--marked the beginning of a period of increased interest in ...

As SEIA continues to fight for the expansion of reliable, low-cost solar power, here is a look back at significant solar milestones over the last 70 years.

Explore the legacy of Guy Sella, the visionary behind SolarEdge. Learn about his contributions to the world of solar energy and how his work continues to inspire future energy projects.

That's why we were excited to attend the second annual Solar Pioneer Party that took place recently in Grass Valley, California. The event is the brainchild of Jeff Spies, a friend of Inovateus who has been ...
