Section 1. Purpose. For too long, the Federal Government has forced American taxpayers to subsidize expensive and unreliable energy sources like wind and solar.

The gap between government subsidies for wind and solar and those for reliable thermal power units like natural gas, nuclear, and coal is massive, and thanks to the Inflation Reduction Act ...

Enormous subsidies for solar and wind generation technologies are proving much more expensive than advertised. They also carry hidden costs and burdens on the grid, most recently seen ...

With federal subsidies ending or becoming hard to claim, companies are racing ahead with solar, wind and battery projects.

In states like Arizona and Texas, several large-scale solar installations have been delayed or paused. Developers are struggling to source equipment at prices that maintain the ...

Under the Trump administration energy policy, as federal subsidies cease to buttress investor confidence and prop project viability, solar industry must shine on its own merits.

Not only does solar power receive tax subsidies, but it has also garnered sizable federal loans, particularly during the Obama-Biden administration. Solar plants are touted to operate for ...

The ongoing debate over solar and wind subsidies is shaping the future of American energy, with significant impacts on electricity costs, job growth, and climate goals.
