This article explores how the shift to solar energy is revolutionizing upstream oil and gas activities and highlights the technical, economic, and strategic challenges faced by industry leaders.

Trina Solar has completed the sale of its 5 GW US solar module factory to T1 Energy, exiting direct manufacturing while retaining a minority equity stake. The company signed a three-year ...

Energy generation from renewables continued its steady upward trend, as a result of increases in solar generation (and despite a drop in wind and hydro generation).

Based on a sample of globally leading solar PV manufacturers originated in Canada, China, Germany, South Korea, and the United States of America we conduct a detailed analysis and ...

Solar PV Power has a potential role to support the Upstream and Mining Industries as part of the Energy Transition. The challenge to utilise 100% Renewables is significant due to the 24/7/365 nature of the ...

High commodity prices and supply chain bottlenecks led to an increase of around 20% in solar panel prices over the last year. These challenges have resulted in delays in solar panel deliveries across ...

The first part includes manufacturing activities of the upstream sector of the PV industry, from feedstocks (metallurgical grade silicon (MG-Si), polysilicon, ingots, blocks/bricks, and wafers) to ...

Strong demand for new energy supply and rising power prices strengthen the market fundamentals for new solar projects in the long term. Overall, our low case is 18% lower than our ...
