The deadline for submission of standalone battery storage project proposals was December 5, 2024. The Bulgarian Ministry of Energy announced on December 6 that it has received ...

Bulgarian solar power plant operator Sunterra RE added co-located energy storage to its operational portfolio. The company"s three photovoltaic systems, with 524 MW in combined peak ...

Bulgaria installed over 1 GW of solar for the third consecutive year in 2025 and is forecast to add over 2 GW this year thanks to a large pipeline of utility-scale projects.

In Bulgaria, the storage of solar energy in batteries is rapidly expanding, with private investors leading the initiative.

In 2024, GSL ENERGY successfully installed a 7.45MWh industrial-grade BESS energy storage battery system in Bulgaria, integrated with solar photovoltaic power generation, to provide ...

Bulgarian renewable energy company Sunterra RE has expanded the capacity of its Kaloyanovo solar power plant near Plovdiv by installing an additional battery energy storage system ...

Bulgaria has 500 MW/1,300 MWh of batteries online and could reach 7,000-10,000 MWh within 12-18 months, ESO says, supporting 10%-15% of daily power needs.

The combined 200 MW battery storage portfolio is designed to be a cornerstone of Bulgaria"s modernizing energy grid. Its primary function is to store excess electricity generated from ...
