Electricity generation from solar, measured in terawatt-hours.

This roadmap provides guidance that can accelerate and scale up solar deployment and reduce regional investment gaps by equitably mobilizing US\$1 trillion of investment in solar energy ...

Spending on low-emissions power generation has almost doubled over the past five years, led by solar PV. Investment in solar, both utility-scale and rooftop, is ...

As of recent analyses, the average cost of solar photovoltaic systems has fallen to below \$3 per watt for utility-scale projects in some regions. Therefore, scaling up to 1 trillion watts could ...

The global solar energy market is projected to reach \$1.6 trillion by 2034, driven by technological advancements and supportive policies, but its long-term growth depends on solving the...

Electricity generation by the U.S. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U.S. ...

Investors are betting big on renewable energy, which is projected to reach \$2.2 trillion this year--more than double the investment in fossil fuels. This accounts for more than 40% of the \$3.3...

Spending on low-emissions power generation has almost doubled over the past five years, led by solar PV. Investment in solar, both utility-scale and rooftop, is expected to reach USD 450 billion in 2025, ...
