As water scarcity and environmental concerns escalate, Switzerland's market for solar water pump inverters is set to expand, driven by innovation and eco-conscious consumer preferences.

We celebrate the recognition of our work and are proud to bring a high quality, reliable solar water pump to farmers and households in Africa, Asia and Latin America.

Switzerland's push toward renewable energy has made Zurich a hotspot for solar innovations. A 40kW photovoltaic energy storage inverter is a game-changer for businesses and large households aiming ...

A solar water pump is a mechanical pump powered by electricity generated using photovoltaic panels. It is popularly referred to as a solar water pumping system because it requires several key components ...

VEICHI solar water pump inverter is a high-efficiency solar water pump controller which can make full use of solar energy to drive water pumps for agricultural irrigation, water supply system, fountains, ...

This article explores why Zurich-based factories like EK SOLAR are critical to Europe's solar transition, backed by market trends, case studies, and actionable insights.

Carbotech, on behalf of Caritas Switzerland, has supported the project development and implementation. The solar water pumps allows small farmers in developing countries to grow ...

Solar pump inverters are a key component of solar pump systems, converting the direct current (DC) output of the solar panels into alternating current (AC) that can be used to power the ...
